EXPERIENCE

Software Engineer III

June 2024 – Present

Walmart Global Tech

Hoboken, NJ

- Developed and maintained a cloud data pipeline ingesting data from 5,000+ stores into Cosmos DB, ensuring near real-time availability.
- Enhanced a high-throughput GraphQL API (800+ TPS) by reducing latency to fetch patient orders by 50% through query optimization and indexing.
- Implemented a new feature enabling consumers to retrieve 10 years of vaccine history, ensuring scalability and reliable data access.
- Migrated a legacy C-based application to Go, supporting data extraction for over 200 database tables across 5,000+ stores.

Software Engineer Intern

May 2023 – Aug. 2023

Walmart Global Tech

Bentonville, AR

- Optimized REST API endpoints by implementing pagination, resulting in a 30% reduction in p99 response times.
- Identified and deployed critical API bug fixes, ensuring consistent functionality and continuous system uptime.
- Conducted rigorous load testing using JMeter to evaluate system performance under high traffic conditions.
- Improved automated alerting by analyzing API logs in Splunk, reducing false positives and improving on-call experience.

Software Developer Intern

June 2022 – Dec. 2022

Clickstop

Urbana, IA

- Implemented a serverless solution using AWS Lambda and DynamoDB to automate record field updates in HubSpot.
- Integrated FedEx, UPS, and USPS APIs to enable near real-time, scalable package tracking across the company.
- Designed and built a downtime monitoring tool using JavaScript and PHP, enabling issue detection and automated alerts.

PROJECTS

BackBlog | *Swift, Kotlin, Firebase*

- Collaborated with a team of five developers to create a social media playlist cross-platform mobile app.
- Integrated Firebase Auth and Firestore for scalable data management and robust authentication protocols.
- Utilized real-time listeners to enable users to add friends and collaboratively modify playlists.
- Achieved 85% code coverage utilizing test frameworks like XCTest, JUnit, and Mockito.

Dashing News | *JS, PostgreSQL*

- Built a full-stack web application enabling admins to create and publish posts.
- Developed an admin dashboard for efficient user and article management.
- Integrated Passport.js to streamline and secure user authentication workflows.

TECHNICAL SKILLS

Languages: Java, Python, Go, SQL, Kotlin, JavaScript

Frameworks: Spring Boot, Spark, GraphQL, React, Node.js, JUnit

Databases/Platforms: Cosmos DB, DynamoDB, Kafka, Google Cloud Platform, AWS, Hive

Tools/IDEs: Git, IntelliJ, VS Code, PyCharm, Visual Studio

EDUCATION

Saint Vincent College

Bachelor of Science in Computer Science

Latrobe, PA

Aug. 2020 – May 2024
